

JFL SEARCH & SELECTION

are a well established recruitment consultancy specialising in the Public Relations, Media Communications and Publishing sectors.

Founded in 1972, JFL has always considered IT an important part in the efficient running of their business, "IT has now become an essential tool in maintaining the high standard of service our clients expect from us" says Ros Kindersley, Managing Director.

Having been a client of **oncore IT's** for the last 6 years, JFL has experienced first hand the evolutionary changes that have taken place at **oncore IT**. From its early Penagen origins through the implementation of the PReSS system and finally to the complete IT outsource business **oncore IT** now is today.

oncore IT now provides JFL with a fully outsourced and completely managed IT service. This includes new file servers, on-line data back-up, firewall, internet provision, software application licensing, as well as new desk top flat screens & keyboards.

The entire IT network is now monitored and maintained remotely by the PReSS system from **oncore IT's** 24 x 7 Network Operations Centre. All management and administration of the IT system is provided by **oncore IT** under its 4 year outsource agreement.

We receive calls every day from other IT companies, but since **oncoreIT** have exceeded our expectations in terms of service and technical ability, and we have built up such a high level of trust with them, we think they are ahead of the rest of the market and currently wouldn't consider moving to another supplier" said Victoria Charlton, Associate Director

"

JFL has recently moved to new offices in Beak Street. **oncore IT** assisted them with the relocation of their entire IT infrastructure and ensured that all their business systems were fully operational on time despite the tight deadline.

"**oncore IT** made it seem effortless through a very difficult and stressful time at JFL. I am so glad we have our IT looked after by **oncore IT**" - Ros Kindersley, Managing Director.
